Kithara at the automatica 2018 in Munich

Kithara Software has announced they will be participating as an exhibitor at this year's *automatica* in Munich from June 19 to 22 at booth B6.126. The trade fair's main points, industrial and service robotics, assembly facilities as well as machine vision are, for a major part, congruent with the latest real-time innovations of the Berlin software company.

At the automatica, one of the most important trade fairs for all topics surrounding production automation, Kithara presents their most recent developments for software-based real-time solutions. The main focus will be on functions of Kithara RealTime Suite for automation with EtherCAT, real-time image capturing and processing as well as networking of automotive interfaces.

„A specialized trade show such as the automatica is the perfect presentation platform for us, since it has a strong focus on topics that are expecially relevant for Kithara. Customers and other interested parties also know exactly what requirements their projects have and are fast to recognize in how far Kithara RealTime Suite has just the right solutions for them.", explained Uwe Jesgarz, managing director of Kithara Software.

At the Kithara booth, visitors are offered visual demonstrations of the real-time systems as well as comprehensive information and personal consultation for individual solutions. People interested in visiting can also contact Kithara directly in order to get free admission tickets for the show.

About Kithara Software GmbH

Kithara Software is a specialist for real-time solutions, especially for the Windows® operating systems family. The real-time extension RealTime Suite is a comprehensive system library for hardware-dependent programming, communication, automation and machine vision. The software is an easy-to-use and powerful technical basis for advanced applications in production and manufacturing, automotive electronics as well as measurement and control engineering. It is the key element in machine building, testing rig development and other specialized applications. Kithara Software has representations in the USA as well as Asia and supports global companies with their innovative projects.
